Our journey on being conscious of our food impact
Locality & Diversity

to help modern challenges of health and wellbeing

Women Empowerment

fair wage, fair opportunity, and empowering culture

Conscious Living

strive to be more conscious & sustainable

Rahsa Nusantara supports the Sustainable Development Goals.
Starting in 2016, in Bandung.

Healthy drink from local herbs & spices without 4Ps (synthetic preservatives, sweeteners, flavors, or coloring).

distributed in offline channels as well as by delivery, and with a returnable packaging system.
Our journey, from 2016 until 2021
One-stop solution focusing on locality & diversity for a healthier and more sustainable production-consumption

Organic Materials Cycle

Revenue & Production Cycle

Consumption & Packaging Cycle

Rahsa Nusantara | #RahsaUntukBumi
Reduce emissions from the food and beverages produced

Being conscious on our part of the food systems

- Local & diverse ingredients
- Natural process for natural products
- Processing our waste
- Reusable & returnable packaging
- Commitment to start calculating & analyzing emission
Choosing local & biodiverse ingredients

- Selecting local & diverse ingredients to support biodiversity - from farmers, farmer groups, artisans and local suppliers.
Natural & healthy products

- Processing local & diverse ingredients into healthy products for our consumers daily consumption.
- With vision to support their healthier & more sustainable lifestyle.
Processes our organic waste

- Sorting our production waste into organic, recycled and residue.
- Processing our organic waste with partner, to be integrated back into the natural cycle (as fertilizer or animal feed)
Reusable & returnable packaging

• Package our products in mostly reusable & returnable packaging (i.e. glass bottles and jars).
  • In addition, glass is healthier for the product (non-porous, non-toxic)
  • Glass can be reused without degrading & recycled with 100% quality without downcycling.
Reusable & returnable packaging

• We have built a returnable packaging system since 2016 in Bandung & Jakarta, and now prototyping it for nationwide consumers.
  • Consumers send back empties to Rahsa Nusantara production system.
  • We give back the bottles' values & sharing the shipping costs responsibility with customers, in the form of vouchers.

*2021 targets

Rahsa Nusantara | #RahsaUntukBumi
Commitment to calculate our food impact

- Initiated a commitment to measure our impact from 5 dimensions: Governance, Workers, Customers, Community, and also Environment.

- One of the steps that will have a huge impact is to start the emission calculation & analysis of our operation & food impact.
Thank You
